

GIUSEPPE PUCCI

Curriculum Vitae - May 4, 2022

National Research Council of Italy, CNR-Nanotec - Ponte P. Bucci, Cubo 33C, Rende 87036 Italy

giuseppe.pucci@cnr.it \diamond www.gpucci.net

I am a **researcher in physics** in the National Research Council of Italy (CNR), located at the University of Calabria. I am fascinated by the possibility of exploring fundamental questions in physics by working on relatively simple, table-top experiments. My primary research lies in phenomena at fluid interfaces, including active systems and hydrodynamic analogs. My research approach also benefits from mathematical modelling and continuous collaboration with theoreticians.

Previously I worked at Università della Calabria, Université Paris Diderot, Massachusetts Institute of Technology, Brown University and Institut de Physique de Rennes.

EDUCATION

University of Paris VII Denis Diderot and University of Calabria. France/Italy
Ph.D. in Physics: Fluid Dynamics and Science of Mesophases. 2008–2011

Mention: *Very Honorable, with Committee Praise.*

Committee composed of:

Riccardo Barberi (Università della Calabria, co-supervisor);
Roberto Bartolino (Università della Calabria, examiner);
Martine Ben Amar (École Normale Supérieure, examiner);
Christophe Clanet (CNRS - École Polytechnique, president);
Yves Couder (Université Paris VII Denis Diderot, supervisor);
Francesco Mantegazza (Università di Milano Bicocca, referee);
Marc Rabaud (Université Paris-Sud, referee).

- Research on the Faraday instability in floating drops: an example of a hydrodynamic instability in a domain with flexible boundaries.
 - Experimentally characterized and theoretically rationalized the equilibrium shapes of floating liquid drops deformed by the radiation pressure of surface waves.
 - Experimentally characterized the non-equilibrium behavior of floating drops deformed by radiation pressure; rationalized their self-propulsion.
 - Collaboration with Prof. Martine Ben Amar (Ecole Normale Supérieure).
- Research on electrohydrodynamics and topological defects in nematic liquid crystals.
 - Characterized the variation of the topological transition threshold in nematic mixtures as a function of the concentration of the components.

University of Calabria. Rende (CS), Italy
Master in Physics of Matter. 110/110 cum laude 2006–2008

- Six-month internship at University Paris VII: Faraday instability in deformable domains.
 - Investigated the equilibrium shapes of drops deformed by the radiation pressure of surface waves.

University of Calabria. Rende (CS), Italy
Bachelor in Physics. 110/110 cum laude 2003–2006

- Three-month internship at University of Calabria: “A novel method to create probes for atomic force spectroscopy”.
 - Developed a new technique to obtain probes for the Atomic Force Microscope with typical curvature radius of about 100 nm.

RESEARCH EXPERIENCE

National Research Council of Italy (CNR), Institute of Nanotechnology. Rende, Italy
Researcher 2021–present

- Research subject: Self-propulsion at fluid interfaces and hydrodynamic analogs.

Institute of Physics of Rennes, University of Rennes 1. Rennes, France
Researcher funded by the program CNRS-Momentum. 2018–2020

- PI of the project “Self-organization of fluid and solid structures on fluid interfaces at the macroscopic scale”. Supervising a post-doc. Topics:
 - Active volatile drops on liquid baths.
 - Faraday instability in a rotating liquid.
 - Capillary surfers: wave-driven particles at a fluid interface (with Prof. D. Harris at Brown University).

Brown University, School of Engineering. Providence (RI), USA
Post-doctoral Research Associate in the group of Prof. Daniel M. Harris. 2017–2018

- Research subject: Forces on capillary floaters.
 - Experimentally characterized and theoretically rationalized the friction experienced by centimetric objects that slide on water.
 - Experimentally characterized and theoretically rationalized the capillary attraction between centimetric objects resting on water (“Cheerios effect”).

Massachusetts Institute of Technology, Dept. of Mathematics. Cambridge (MA), USA
Post-doctoral Research Associate in the group of Prof. John W. M. Bush. 2015–2017

- Research subject: Walking droplets as a hydrodynamic analog of microscopic systems.
 - Rationalized the reflection of a walking droplet from a planar wall; found non-specular reflection.
 - Characterized through precise experiments the interaction of walking droplets with single and double slits; found non-quantum behavior in this configuration.
 - Characterized the refraction-like behavior of walking droplets experiencing a reduction in liquid depth; found an effective Snell’s law and other optical analogs.
 - Experimentally investigated the diffusion of a droplet bouncing on a field of standing waves.
 - Experimentally investigated the spin lattices of walking droplets; found anti-ferromagnetic order. Work actively pursued by P. Sáenz at MIT. Collaboration with Prof. Jörn Dunkel (MIT).

Massachusetts Institute of Technology, Dept. of Mathematics. Cambridge (MA), USA
Post-doctoral Fellow (visiting) in the group of Prof. John W. M. Bush. 2014

- Experimentally demonstrated and theoretically rationalized the partial coalescence of a soap bubble and a soap film.
- Designed and set up an experiment for the study of walking droplets interacting with a single slit; found transition to chaos.

University of Calabria, Dept. of Physics. Rende (CS), Italy
Post-doc in the group of Prof. Riccardo Barberi 2012–2015

- Research on the project “Innovative nanotechnologic platforms for drugs delivery in Ophthalmology”. Collaboration with Marco Lombardo (Doctor of Medicine, Vision Engineering Italy).
 - PI of the group investigating the interaction of ultraviolet light with the human cornea.
 - Designed apparatus that mimics the physiological conditions of the eye for the measurement of light absorbance and the detection of clinical solutions inside the human cornea.
 - Tested a number of trans-epithelial commercial solutions; assessed which solutions were effectively absorbed and could be used for medical treatment.

- Research subject n.2: electro-convective instabilities and topological defects in nematic liquid crystals.
 - Discovered curved patterns of electro-convection in nematics with planar-periodic alignment.
 - Characterized the topologically non-equivalent textures generated by the electrohydrodynamics of nematic liquid crystals.

SKILLS AND EXPERTISE

Fluid Dynamics	fluid interfaces, surface waves, surface tension.
Soft Matter	active matter, liquid crystals, corneal tissues, AFM, cleanroom techniques.
Non-linear physics	pattern formation, self-organization.
Mechanics	design and construction of setups for mechanical vibrations.
Fabrication	3D printing and laser cutting.
Computer Languages	C/C++, MATLAB.
Software & Tools	Mathematica, Fusion 360 (3D designing), Adobe Illustrator.
Languages	Italian (first language), French (fluent), English (fluent).

GRANTS

Short-Term Mobility grant. CNR-Nanotec, Rende, Italy
National Research Council of Italy (CNR). 2021

- 2100€ for the visit to CNR-Nanotec of Antonin Eddi, researcher in the French CNRS.

Project grant. Institute of Physics of Rennes, France
French National Center for Scientific Research (CNRS), Momentum program. 2018–2020

- About 350 k€ (included a personal salary and two-year salary for a post-doc).

Workshop grant. Brown University, USA
National Science Foundation of U.S.A. (NSF), Condensed Matter Physics program. 2018

- 5000 \$ for organizing the workshop “Hydrodynamic Quantum Analogs 8” (with Prof. Daniel Harris, award number 1841840).

Mobility grant. University of Paris VII, France
Université Franco-Italienne. 2009–2011

- About 4500 € to spend for travels during the Ph.D.

FELLOWSHIPS

Post-doctoral Fellowship University of Haifa, Israel
The Hatter Departement of Marine Technology. 2015–2016

- To spend at the Massachusetts Institute of Technology, Cambridge (MA).

Ph.D. fellowship. University of Paris VII, France
Ph.D. funded by Université Franco-Italienne 2008–2011

- To spend at University of Paris VII (main institution) and University of Calabria (secondary institution).

TEACHING EXPERIENCE

- Teaching Assistant for Scientific Data Acquisition and Processing.** Univ. of Calabria, Italy
Developing experimental projects with master students in Physics. Fall 2021
- Instructor of Macroscopic Quantum Analogs.** Univ. of Calabria, Italy
PhD students in Physical, Chemical, Materials Sciences and Technologies. Summer 2021
- Assistant Instructor of Electricity and Magnetism.** Univ. of Calabria, Italy
Bachelors in Electronic Engineering. Spring 2021
- Assistant Instructor of Fluid Mechanics.** Univ. of Rennes 1, France
Master in Fundamental Physics. Fall 2019 and 2020
- Instructor of Fluid Mechanics.** Univ. of Rennes 1, France
Master in Fundamental Physics. Fall 2018
- Teaching Assistant (Instructor) of Differential Equations.** MIT, USA
1st year bachelor level. Overall rating: 6.2/7. Spring 2017
- Assistant Instructor of Quantum Mechanics and General Physics.** Univ. of Calabria, Italy
Bachelors in Materials Science and Architectural Engineering. 2012–2013
- Assistant Instructor of Physics and Mathematics.** Univ. of Paris VII, France
Bachelors in Physics, Chemistry and Life Sciences. 2008–2011

TEACHING QUALIFICATIONS

French Qualification for Assistant Professor. France
Maître de conférences. 2017

Italian Qualification for teaching in high schools. Italy
Active Formative Apprenticeship, for teaching Mathematics and Physics. Score 99/100. 2015

- Apprenticeship in a high school.
- Attended classes on the teaching of Mathematics and Physics, Pedagogy and didactics for inclusion, Didactical techniques for inclusion, History of Pedagogy, Theory and Methods of evaluation.

SUPERVISION

Alessia Cirimele CNR-Nanotec, Italy
Bachelor student, University of Calabria, Italy. Apr–July 2022

- Diffraction with a pilot-wave model.

Capucine Eudes CNR-Nanotec, Italy
Master student, École Nationale d'Ingénieurs de Brest, France. Mar–July 2022

- Wave field of capillary surfers.

Antoine Bellaigue Institute of Physics of Rennes, France
Master student in Physics, University of Rennes 1, France. May–July 2020

- Numerical simulations of a classical wave-particle duality interacting with single and double slits.

Jérémy Archer Institute of Physics of Rennes, France
Master student in Physics, University of Rennes 1, France. May–July 2020

- Surface reconstruction of Faraday instability patterns.

Paul Remigereau

Master student in Physics, University of Rennes 1, France.

Institute of Physics of Rennes, France

May–July 2019

- Faraday instability in a rotating fluid.

Benjamin Reichert

Post-doc within the program CNRS-Momentum.

Institute of Physics of Rennes, France

2018–2020

- Thermal active drops and Faraday instability in a rotating liquid.

Co-supervisor of Pierluigi Bilotto and Giuseppe Di Nardo

Bachelor students, final internship.

University of Calabria, Italy

2014

- Walking droplets interacting with a single slit.
- Analogies between the De Broglie-Bohm pilot-wave theory and walking droplets.

MENTORING

Paul Massiot

Master student in Physics, University of Rennes 1, France

Institute of Physics of Rennes, France

Sep. 2019 – Jan. 2020

- Technique for the reconstruction of a perturbed fluid surface.

Ian Ho

Bachelor student.

Brown University, USA

Jan.–July 2018

- Centimetric objects sliding on water and their mutual interaction due to capillary forces.

Roy Glavanitz

Bachelor student from Munich University of the Federal Armed Force.

Brown University, USA

May–July 2018

- Design and implementation of a swimmer at intermediate Reynolds number.

Alexis Goujon

Master student from Ecole Polytechnique.

MIT, USA

Spring 2017

- Spin lattices of walking droplets.

Jean-Baptiste Moiroud

Master student from Ecole Polytechnique.

MIT, USA

Spring 2017

- Walking drops in double and triple cavities. Tunneling of walking drops.

Crystal Owen, Andrew M. Fiore and Filip Twarowski

Ph.D. and master students, for projects of the course Interfacial Phenomena.

MIT, USA

Spring 2016

- Vibration of soap bubbles.
- Non-linear phenomena in a liquid-on-liquid wetting system.
- Faraday-wave propelled boat.

Benjamin Aubin

Master student from Ecole Polytechnique.

MIT, USA

Apr.–July 2016

- Refraction of walking droplets.

Clément Fontaine

Bachelor student.

University Paris VII

May 2010

- Faraday instability in a rotating fluid.

ORGANIZATION OF MEETINGS

Co-organizer of the meeting Hydrodynamic Quantum Analogs 8 Brown University, USA
July 2018

- About 30 participants from: MIT, University of Liège, IMPA (Rio de Janeiro), New Jersey Institute of Technology, National Autonomous University of Mexico, University of Bath (UK), California Polytechnic State University, Monash University (Australia) and Brown University.

Co-organizer of the meeting Hydrodynamic Quantum Analogs 5 Calabria, Italy
July 2015

- About 25 participants from: MIT, University of Liège, IMPA (Rio de Janeiro), KAUST (Saudi Arabia), New York University, Max Planck Institute for Dynamics and Self-organization (Göttingen), University of Bath (UK) and University of Calabria.

ACADEMIC RESPONSIBILITIES

Elected representative of Ph.D. students. University of Paris VII, France
Doctorate School “Condensed Matter and Interfaces”. *2009–2011*

Elected representative of Physics students. Univ. of Calabria, Italy
Laurea Course Council, addressing organization of classes and course work. *2006–2008*

AWARDS

Second best presentation in Physics of Matter, Italian Physical Society. Italy (virtual)
Meeting of the Italian Physical Society. *2021*

- Presentation “Hydrodynamic Spin Lattices”.

Gallery of Fluid Motion Award Winner. Denver (CO), USA
American Physical Society - Division of Fluid Dynamics *Nov. 2017*

- Video “Spin lattices of walking droplets”.

Travel award. Denver (CO), USA
American Physical Society - Division of Fluid Dynamics. *Nov. 2017*

- 500\$ to participate to the meeting of the Division of Fluid Dynamics of the American Physical Society.

Milton van Dyke Award Winner. Boston (MA), USA
American Physical Society - Division of Fluid Dynamics. *Nov. 2015*

- Video “The merger of a bubble and a soap film”.

Milton van Dyke Award Winner. San Francisco (CA), USA
American Physical Society - Division of Fluid Dynamics. *Nov. 2014*

- Video “Faraday instability in floating drops”.

Best presentation in Physics of Matter, Italian Physical Society. Naples, Italy
Meeting of the Italian Physical Society. *2012*

- Presentation “Faraday instability in deformable domains”.

OUTREACH

- Organizer of a stand for a Science Festival.** Rennes, France
Stand of the Soft Matter Department of the Institute of Physics of Rennes. Oct. 2020
- Guide of high school students during the Science Week.** University of Paris VII, France
One-day visit of students from Lycée Charles de Foucault of Paris. Oct. 2010
- Guide of University students.** University of Paris VII, France
One-day visit of the Physics Students Association of Perugia, Italy. Nov. 2010
- Includes a meeting with Prof. Atef Asnacios.

SEMINARS

- Wave-driven particles at a fluid interface** Rome, Italy
Department of Physics of La Sapienza and CNR - Institute for Complex Systems. Sep. 2021
- Wave-driven particles at a fluid interface** Padua, Italy
Department of Physics, University of Padua. Sep. 2021
- Capillary surfers** Paris, France (virtual)
Laboratoire Gulliver - ESPCI. May 2021
- Hydrodynamic spin lattices** Italy (virtual)
Joint GSSI - Sapienza Webinars on Statistical Mechanics. May 2021
- Water sliders, capillary attraction and capillary surfers** Paris, France (virtual)
Laboratoire Matière et Systèmes Complexes. Feb. 2021
- Capillary surfers: Self-propelling particles at an oscillating fluid interface** Providence (RI), USA (virtual)
Fluids at Brown and Fluids and Thermal Sciences Joint Seminar Series. Apr. 2020
- Hydrodynamic analogs on a vibrating bath** Poitiers, France
Pprime Institute. Feb. 2019
- Soap bubbles, walking drops and sliders at fluid interfaces** Marseille, France
Laboratories IRPHE and IUSTI, University of Aix-Marseille. Oct. 2018
- Drops, sliders and bubbles at the liquid surface** Rennes, France
Rennes School on Complex Systems. Oct. 2018
- Soap bubbles, walking drops and sliders at fluid interfaces** Orsay, France
Laboratories FAST and LIMSI, University of Paris-Sud. Sep. 2018
- Three experiments with drops and bubbles on fluid interfaces** Providence (RI), USA
School of Engineering at Brown University. Nov. 2017
- Walking droplets interacting with boundaries** Lyon, France
Institute of Light and Matter, University Claude Bernard Lyon 1. Oct. 2017
- Hydrodynamic analogs** Boston (MA), USA
Department of Physics at the University of Massachusetts, Boston. Apr. 2017
- Walking droplets interacting with submerged boundaries** Rennes, France
Institute of Physics of Rennes, University of Rennes 1. Dec. 2016

Three experiments with drops and bubbles on fluid interfaces <i>Marine Technology Research Institute (INSEAN).</i>	Rome, Italy May 2015
Faraday instability in deformable domains <i>Physical Mathematics group, Dept. of Mathematics, Massachusetts Institute of Technology.</i>	Cambridge (MA), USA Feb. 2014
The Faraday instability in deformable domains <i>Jean le Rond d'Alembert Institute, University Pierre et Marie Curie (UPMC).</i>	Paris, France Jan. 2012

INVITED CONFERENCE PRESENTATIONS

Capillary disks: sliding friction, capillary attraction and wave-driven propulsion <i>* Selected for long talk at Rencontre du Non-Linéaire (RNL), then meeting canceled.</i>	Paris, France 2020
Spin lattices of walking droplets. <i>Conference Waves Côte d'Azur.</i>	Nice, France Jun. 2019
Diffraction and interference of walking droplets <i>European Fluid Mechanics Conference.</i>	Sevilla, Spain Sep. 2016

OTHER CONFERENCE PRESENTATIONS

Non-exhaustive list.

Emergent order in hydrodynamic spin lattices <i>*Selected for the workshop of the Institute of Nanotechnology of CNR.</i>	(online) Nov. 2021
Forces on capillary disks <i>International Conference of Theoretical and Applied Mechanics</i>	(online) Aug. 2021
Exploring diffraction with a pilot-wave model <i>March Meeting of the American Physical Society.</i>	(online) Mar. 2021
Capillary surfers: self-propelling particles at an oscillating fluid interface <i>Meeting of the Italian Physical Society.</i>	(online) Sep. 2020
Exploring diffraction with a pilot-wave model <i>Meeting of the Division of Fluid Dynamics of the American Physical Society.</i>	Chicago (IL), USA (online) Nov. 2020
Capillary surfers: Self-propelling particles at an oscillating fluid interface <i>Meeting of the Division of Fluid Dynamics of the American Physical Society.</i>	Seattle (WA) Nov. 2019
Friction on water sliders <i>European Fluid Mechanics Conference</i>	Vienna, Austria Sep. 2018
Spin lattices of walking droplets <i>Condensed Matter Days, French Physical Society.</i>	Grenoble, France Aug. 2018
Partial coalescence of a soap bubble with a soap film <i>March Meeting of the American Physical Society.</i>	Los Angeles (CA), USA March 2018
Droplets bouncing on a standing wave field <i>Meeting of the Division of Fluid Dynamics of the American Physical Society.</i>	Denver (CO), USA Nov. 2017

Walking drops interacting with submerged boundaries <i>Workshop “Waves and particles, novel insights”.</i>	Mexico City, Mexico May 2017
Diffraction and interference of walking droplets <i>Meeting of the Division of Fluid Dynamics of the American Physical Society.</i>	Portland (OR), USA Nov. 2016
Walking droplets interacting with planar boundaries <i>Meeting of the Division of Fluid Dynamics of the American Physical Society.</i>	Boston (MA), USA Nov. 2015
Faraday instability in deformable domains <i>Meeting of the Division of Fluid Dynamics of the American Physical Society.</i>	San Francisco (CA), USA Nov. 2014
Order reconstruction in turbulent nematics <i>Meeting of the Italian Liquid Crystal Society.</i>	Ravenna, Italy 2014
Faraday instability in deformable domains <i>Meeting of the Italian Physical Society.</i>	Naples, Italy 2012
Turbulence induces change of topology in calamitic nematics <i>Meeting of the Italian Liquid Crystal Society.</i>	Rome, Italy 2012
Mutual adaptation of a Faraday instability pattern with its flexible boundaries <i>Fluid - DTU Summer School.</i>	Denmark 2011
The interplay of an instability pattern with its flexible boundaries <i>Conference “On growth and forms” in honour of Prof. Yves Couder.</i>	Agay, France 2010
Faraday instability in deformable domains <i>Fluid - DTU Summer School</i>	Denmark 2009
Force measurements at nanoscale by an atomic force microscope <i>Summer course of Scuola Normale Superiore.</i>	Cortona, Italy 2006
