I am a **researcher in physics** in the National Research Council of Italy (CNR), located in the Department of Physics at the University of Calabria. Previously I worked at Università della Calabria, Université Paris Diderot, Massachusetts Institute of Technology, Brown University and Institut de Physique de Rennes. I am fascinated by the possibility of exploring fundamental questions in physics by working on relatively simple, table-top experiments. My primary research lies in phenomena at fluid interfaces, including active systems and macroscopic analogs of quantum phenomena. My research approach also benefits from mathematical modelling and continuous collaboration with theoreticians.
